

PERFECTSENSE MATT

Contrasting alternative to the high-gloss surface is matt. Traditionally the matt surfaces are associated with high quality and are mainly used for the production of expensive furniture. High quality PerfectSense Matt (PM) distinguishes it from other matt surfaces.

The new range also provides greater freedom of design. The sophisticated surface of PerfectSense can be used on furniture fronts, and matched the plate with melamine for the corpus.

PerfectSense Matt has a warm and soft touch. During the production of PerfectSense Matt a revolutionary process of UV coating is used. New technology ensures that fingerprints do not remain on the surface.

Features:

- The unique design and structure
- Matt surface protected from fingerprints
- Scratch resistance and durability
- MDF (Medium Density Fibreboard) as base provides an extremely smooth surface
- The protective film protects the matt side during processing
