

## CARE AND MAINTENANCE OF BOARD

**The board used for the production of N O C L A F Moisture-resistant Furniture has a durable surface, very easy to clean:**

1. The resulting stains should be cleaned on a regular basis.
2. Use available house hold cleaners, except for:
  - Cleaners or scrubbing (abrasive powders, sponge with a rough surface, steel wool).
  - Polishing agents, detergents, furniture cleaners, bleaching substances.
  - Cleaning agents containing strong acids and strongly acidic salt.
  - A steam cleaner.
3. You should also avoid direct contact with furniture objects that may permanently damage the surfaces (sharp objects, fire and objects heated to a high temperature).
