

CAUTION TEST!

For the production of **NOC LAF** Moisture-resistant Furniture we use the highest quality components and the latest technologies. The use of PU glue on furniture workpieces achieves exceptional resistance to moisture and water during use. The screws used in production have the WIROX anti-corrosion coating, which guarantees durability of even the smallest parts of our products.

To test the durability of **NOC LAF Moisture-resistant Furniture we present you the test form.**

The instruction manual is very simple.

1. Write the date of immersion in water on the label.
2. Immerse the test form in water half-way, so you do not get the label wet. You will be able to compare the wet and dry part of the test form.
3. Leave the test form in water for as long as you want.

Caring for the environment all test form are made from post production waste.
